Career Potential: Issues covered during course work include developing a business plan, obtaining resources, managing finances, developing a strategy, selecting managers and employees, organizing and designing the business, identifying and capitalizing on international opportunities, managing technology, and successfully dealing with managerial challenges.

As an entrepreneurship student, you will take courses that provide an overall understanding of business such as accounting and finance, basic management, marketing, and information technology and decision sciences. In addition, you will focus on courses in entrepreneurship (both theory and practice), international management, business ethics, and organizational design and technology management, among others.
